## REQUIRED READING: BLEEDER

Once you start reading *Bleeder*, the new memoir from first time author Shelby Smoak, you're very likely to miss your next train stop, urgent phone call, doorbell—what have you. It's that good. Shelby tells his own personal story of growing up struggling with hemophilia and then finding out on his 18th birthday that he is HIV positive due to a tainted transfusion in the 1980s. It's one part medical nightmare, and many parts smart, funny and beyond hopeful. Snap it up.
